Parents,

May 17, 2017

The attached School Profiles (previously titled School Report Card) is a report of the 2015-16 educational progress for Greenwood Elementary. The report includes a collection of last year’s testing (spring 2016). It represents data from all public schools across the state of Oklahoma and is generated by our state Education Oversight Board. As you preview the report, you will see that the information provides our test results and also compares our students’ performance in reading and math on the Oklahoma Core Curriculum Tests to Oklahoma school averages.

The graphic representation indicates that 85% of last year’s third grade students at Greenwood scored satisfactory or above in Math and 92% in Reading. The graph also tells us Greenwood’s third graders scored above the state average in both Reading and Math.

For last year’s fourth graders at Greenwood, the graph indicates that 88% scored Satisfactory & Above in Math and 78% in Reading. When compared with the state’s average scores, Greenwood scored above the state average in Reading and scored the same state average in Math.

The graph indicates 5th grade students scored 93% proficient in Math compared to state average of 79%. Reading average of 79% proficient was slightly below the state average of 82%. Social Studies average of 75% was also slightly below the state average of 77%. Science average of 67% was slightly above state average of 65%.

An additional report notes data representation including all students. The averages include scores of English Language Learners (ELL) and Special Education. The report notes lower averages than the regular education report but proficiency percentages are above the state averages of all students, with the exception of 5th grade Reading at 72%, which is slightly below the state average of 73%.

It is our desire that you look over this report carefully. Please know that Greenwood will continue to strive for high academic performance. In addition, it is our goal to provide educational opportunities beyond these reported core areas of reading and math.

We recognize that Greenwood’s educational successes are directly impacted by your involvement. We firmly believe that the strong relationships we continue to build with our students and their families will help each child reach their full potential.

Greenwood wants to say “thank you” for past successes and once again look forward to teaming with you for future educational opportunities at Greenwood. If you have any questions, please call my office at 458-4120. As always, I look forward to visiting with you any time.

Sincerely,

Susan VanZant
Principal
Greenwood Elementary School
